Well-Typed
The Haskell Consultants

Certificate

Naman Aryan

has completed the Remote Interactive Course

Introduction to Haskell

This course consists of pre-recorded videos for self-study and a number of assignment sets that are manually reviewed by the instructors.

Topics covered:

Haskell syntax · datatypes and functions · pattern matching · lazy evaluation · equational reasoning · parametric polymorphism · common type classes · higher-order functions · IO and explicit effects · monads (Maybe and State)

Instructors: Dr. Andres Löh, Pi Delport, Dr. Tomasz Tylec
